SK Movagate

Features:

The SK Movagate is the ultimate solution for suspended curtain track system cubicle tracks where there is a requirement for a hoist. Designed with a robust sprung-loaded hinge and magnetic latch technology, the SK Movagate allows the hoist to pass swiftly and easily through the track whilst maintaining 100% patient privacy at all times. The maintenance-free SK Movagate is supported with white suspended V-hangers to ensure a firm and positive installation. White powder-coating incorporating Biosafe antimicrobial treatment.

Benefits:

The SK Movagate provides the ultimate solution. Due to the rigidity of the YewdaleMovatrack® cubicle track system, this simple but effective solution is designed to be retro-fitted to any existing SK Movatrack® arrangement or installed with a new installation of SK Movatrack® cubicle track. Available worldwide, SK Movagate has enabled Architects, Trusts and Contractors to approach both patient handling and privacy in a new light and is now revolutionising the design of patient areas.

Specification:

The Movagate Extruded aluminium track with white powder-coated finish incorporating Biosafe antimicrobial treatment. To be suspended with white V-hangers in line with YewdaleMovatrack® cubicle tracking (at 2.1m above floor level or as specified) in accordance with manufacturer's instructions. Layout as shown on accompanying drawings. Fitting to be carried out by trained and accredited personnel.
