

SKK2500

Safety window curtain track

SKK2500 Safety window curtain track

Features:

The SKK2500 curtain track reduces the risk of ligature as it fits flush to the wall, making it ideal for health settings, care homes and detention centres. Designed with safety in mind, it eliminates the risk of its use as a weapon in high-risk mental health environments. The premium aluminium track comes as standard in white with rounded end brackets. Pin hex anti-tamper security screws are secured into countersunk fixing holes at 150mm intervals to provide a tight fit to the wall or ceiling. Supplied with 16 anti-ligature gliders per meter for a smooth curtain pull. When under an excess load of 20kg and over, the curtain will separate from the gliders leaving the track and gliders securely in place. The reduced ligature curtain track is easy to install by someone competent, is wipe clean and requires little maintenance. Curtains are not supplied.

Benefits:

The smooth operation of the anti-ligature gliders ensures ease of use and reduces the chance of the curtain being pulled down due to heavy manual handling. The gliders stay within the track making the curtain easy to re-install if removed. There are no large gaps between the gliders keeping the appearance of the curtain consistent. No large plastic parts can be removed from the curtain or the track.

Options:

Any RAL colour available to order.

Specification:

The reduced ligature SKK2500 safety window curtain track. Manufactured from powder-coated white aluminium, installed using tamper-proof screws and comes as standard with anti-ligature plastic curtain gliders (hooks to be sewn into curtains separately by third-party).

O+M Guidance

It is an NHS requirement that items suspended on load-release support systems should be maintained and load-tested in accordance with the manufacturer's instructions on an annual basis. The SKK2500 system is maintenance-free and its performance remains constant even after repeated use. It is a requirement, however, to carry out a physical inspection and testing of YewdaleKestrel® fittings to identify any possible damage or evidence of tampering and undertake an annual load test. Annual testing should only be carried out by Protects Plus 0345 646 0955.
