

SK K505PW Shower head holder

Features:

The SK K505PW magnetic shower head holder provides another anti-ligature solution for an area that may otherwise be difficult to monitor. High grade swivelling plastic provides support for many positions mounted to a high quality moulded polycarbonate SK K09AW (100 x 170mm mounting plate (included).

Specification:

The magnetic anti-ligature SK K505PW shower head holder. Lightweight, anti-shatter construction complete with magnetic brackets to allow plates to part from brackets under excessive load.

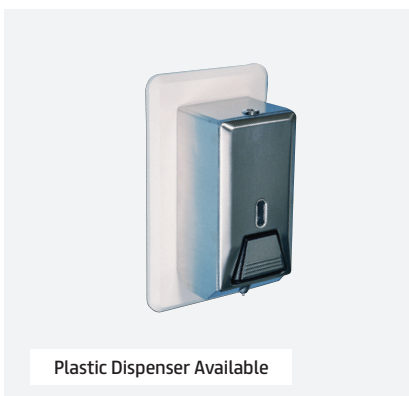

SK K509PW Toilet roll holder

Features:

The SK K509PW magnetic toilet roll holder provides another anti-ligature solution for an area that may otherwise be difficult to monitor. High grade, lightweight swivelling plastic holder securely holds one toilet roll. Mounted on a high quality moulded polycarbonate K09AW (100 x 170mm) mounting plate.

Specification:

The magnetic anti-ligature SK K509PW toilet roll holder. Lightweight, anti-shatter polycarbonate construction complete with magnetic brackets to allow plates to part from brackets under excessive load.

Plastic Dispenser Available

SK K510 Soap dispenser

Features:

The durable, high quality SK K510 stainless steel dispenser has non-drip, one shot action. Mounted to a high quality moulded polycarbonate K09BW (190 x 335mm) mounting plate.

Specification:

The magnetic anti-ligature SKK510 soap dispenser. Satin stainless steel dispenser with non-drip, one shot action mounted to moulded backing plate, complete with magnetic brackets to allow plate to part from brackets under excessive load.

Plastic Dispenser Available

SK K511 Paper towel dispenser

Features:

The durable, high quality SK K511 lockable stainless steel dispenser has a stock level indicator window. Mounted to a high quality moulded polycarbonate K09CW (330 x 470mm) mounting plate.

Specification:

The magnetic anti-ligature SKK511 paper towel dispenser. Satin stainless steel dispenser for C-fold/multi-fold towels with lock, mounted to moulded backing plate, complete with magnetic brackets to allow plate to part from brackets under excessive load.

SK K514 Shelf Set

Features:

The SK K514 anti-ligature magnetic shelf is constructed from durable, shatter-proof polycarbonate with holes for individual item placement. The 270mm x 140mm shelf is mounted to two wall-fix brackets for a fully fail-safe* solution.

Specification:

The magnetic anti-ligature SK K514 Shelf set. Clear robust polycarbonate construction, mounted to two magnetic brackets to ensure shelf consistently parts from brackets under excessive load.

SK K515 Polycarbonate mirror

Features:

The SK K515 anti-ligature polycarbonate mirror is designed to be virtually indestructible. Having the same dimensions as a K09CW mounting plate (330 x 470mm) and incorporating 2 magnetic fixing points (included).

Specification:

The magnetic anti-ligature SK K515 Polycarbonate mirror . Anti-shatter construction complete with magnetic brackets to allow mirror unit to part from brackets under excessive load.

SK K516 Wipe board

Features:

The SK K515 anti-ligature wipe board offers a notice board solution for all anti-ligature environments. Having the same dimensions as a K09CW (330 x 470mm) mounting plate and incorporating two magnetic fixing points (included).

Specification:

The magnetic anti-ligature SK K515 Wipe board. Anti-shatter construction complete with magnetic brackets to allow board to part from brackets under excessive load.

SK K512 Soapdish

Features:

The SK K512 anti-ligature soap dish is manufactured from steel with a polished satin finish. Mounted to a high quality moulded polycarbonate K09AW (100 x 170mm) SK mounting plate (included).

Specification:

The magnetic anti-ligature SK K512 Soap dish in satin polished steel. Anti-shatter construction complete with magnetic brackets to allow plate to part from bracket under excessive load.

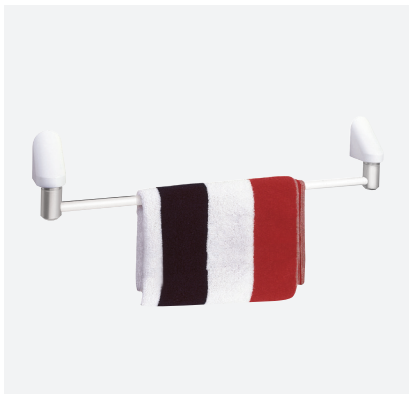

SK K512PW Soap dish

Features:

The SK K512 anti-ligature soap dish is manufactured from high grade plastic. Mounted to a high quality moulded polycarbonate K09AW (100 x 170mm) mounting plate (included).

Specification:

The magnetic anti-ligature SK K512 Soap dish in white plastic. Anti-shatter construction complete with magnetic brackets to allow plate to part from bracket under excessive load.

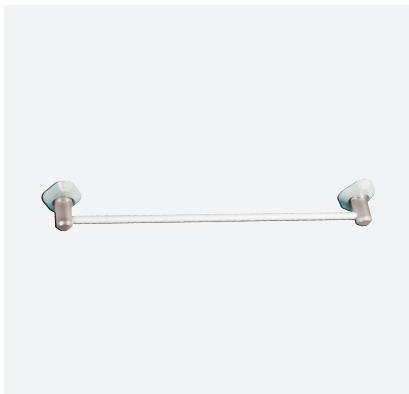

SK K504 Towel rail

Features:

The SK K504 clear towel rail provides a convenient towel drying facility in an otherwise anti-ligature environment. The 500mm rail and its holders will part from the brackets to allow 100% fail-safe* solution under excessive load.

Specification:

The magnetic anti-ligature SK K504 towel rail. Lightweight, clear polycarbonate construction complete with holders and magnetic wall-fix brackets to allow rail to part from brackets under excessive load.

SK K530 Wardrobe rail

Features:

The SK K530 clear wardrobe rail provides a convenient garment hanging facility in an otherwise anti-ligature environment. The rail, including the brackets (500mm; or K530/10 - 1000mm; or K530/15 - 1500mm) and its holders will part from the brackets to allow a 100% fail-safe* solution under excessive load.

Specification:

The magnetic anti-ligature SK K530 wardrobe rail. Lightweight, clear polycarbonate construction complete with holders and magnetic top-fix brackets to allow rail to part from brackets under excessive load.

SK K508 Flexible coat hook

Features:

The SK K508 flexible coat hook has been developed in response to repeated requests from hospital staff. This hook is as strong as a standard coat hook in normal use, yet gives NO point of ligature.

Specification:

The magnetic anti-ligature SK K508 flexible coat hook. 2-part white plastic construction complete with hook from special pliable formulation and magnetic wall-fix bracket to allow hook to part from bracket under excessive load.
