

SKK100

Shower track

SKK100 Shower track

Features:

The rigid, high-grade aluminium track section and maintenance-free, wheeled roller hooks are just an introduction to the SKK100 shower track system. Designed to give years of trouble-free service and specifically for high-risk mental health areas, this shower track system uses magnetic wall-fix brackets where tracks meet the wall, and magnetic top-fix brackets where suspension hangers meet the ceiling. This ensures that, under excess load, the suspension hanger separates from the ceiling bracket leaving no remaining points of ligature - a highly essential safety feature, as it is surprisingly easy to attach a cord to a fixed vertical rod and use it as a ligature point.

Benefits:

Strength and simplicity make the SKK100 the first choice for a full number of applications. The maintenance-free, premium quality track system has a strong and attractive aluminium profile which offers you more for less, in that it is able to span 2.5 metres between hangers, providing long term reliability. In a similar fashion, curtain removal points are provided

as standard on every track for added convenience when replacing curtains. The self-lubricating roller runner hooks are quickly loaded into the track through this point of access, making the process a pleasurable experience. Mounted on magnetic brackets for 100% fail-safe* anti-ligature functionality.

Options:

Silver anodised track; Any RAL colour available to order; Biosafe antibacterial treatment option available within white powder-coated finish only.

Specification:

The magnetic anti-ligature SKK100 shower track system. Track manufactured from premium quality aluminium with white powder-coated finish. Complete with roller runner hooks at 10 per metre, and magnetic wall-fix/top-fix brackets spaced in accordance with manufacturer's recommendations. Fitting to be carried out by trained and accredited personnel.

O+M Guidance

It is an NHS requirement that items suspended on load-release support systems should be maintained and load-tested in accordance with the manufacturer's instructions on an annual basis. The SK Anti-Ligature system is maintenance-free and its performance remains constant even after repeated use. It is a requirement, however, to carry out a physical inspection and testing of YewdaleKestrel® fittings to identify any possible damage or evidence of tampering and undertake an annual load test. Annual testing should only be carried out by Protects Plus 0345 646 0955.
