

roach fabric

The YewdaleDefiant® Roach fabric is designed for areas where a high level of light exclusion is required along with exceptional performance characteristics. The unique fabric weave with a white PVC reflective coating on the reverse ensures total light exclusion whilst maintaining a superior fabric weave appearance. With three colours along with one of the most advanced production procedures, the flame retardant fabric is designed with commercial, educational and healthcare environments in mind.

- Fabric Composition:** 70% PVC, 30% Polyester
- Fabric Range:** 3
- Roller Fabric Width:** 2500mm (98.4")
- Fabric Thickness:** 0.60mm
- Fabric Weight:** 560 g/m²
- Fire Retardancy:** Conforms to BS5867, Part 2: Type B 2008 Blackout. Suitable for computer environments
- Shading:** Suitable for moist conditions
- Moisture Resistance:** Wipe clean
- Care Instructions:** Mesh/in: 48 x 48

this fabric range comes with a full **LIFETIME Warranty** as standard.

shading efficiency

Transmittance is the amount of light and heat transmitted beyond the fabric. The lower the amount, the greater the efficiency.

Block/reflect is the amount of heat and light that is blocked or reflected. The higher the amount, the greater the efficiency.

Absorption is the amount of heat and light absorbed in the fabric. The higher the amount, the lower the efficiency.

Ultraviolet protection illustrates how protective the fabric is against ultraviolet rays. The higher the amount, the greater the effectiveness.

	2500mm						
	Heat Transmittance %	Light Transmittance %	Sunblock %	Ultraviolet Protection %	Absorption %	Heat Reflection %	
White	0	0	100	100	30	70	
Magnolia	0	0	100	100	29	71	
Light Grey	0	0	100	100	30	70
