

# **SK Tracker Fabric Retaining System**

The tracker channel completely removes the common issues with fabric blowing or being pushed out of side channels in cassetted blinds. The system guarantees that the fabric will stay 100% secure and will work with nearly all of the SK range of cassetted blinds. Popular with schools, colleges, universities and hospitals where windows are frequently left open or blinds are manhandled.

## Benefits

The channel measures 50 x 24.8mm and is available in black or white hardware.

Suitable for the cassette systems C40/C44/C45 and C47.

The tracker side channel will cater to both recesses and face fix applications.

The unique channel will cater to uneven reveals and provides maximum light exclusion.

Clever flexible plastic seals maintain constant fabric tension.

## Options

Available in black or white hardware.
